

PRITAM KUMAR

Software Engineer | Full Stack Developer (React / Node.js)

pritamjangir62@gmail.com | +91 8003107826 | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

SUMMARY

MCA graduate (2026) building production web apps with React, Node.js, PostgreSQL, and MongoDB. Sole frontend developer at Clinq on a multi-role production platform; previously shipped live features during a frontend internship and independently designed, deployed, and load-tested two backend systems end-to-end.

EXPERIENCE

Frontend Developer — Clinq Jul 2026 – Present

React · JavaScript · REST API Integration · Multi-role Platform

- Sole frontend developer for Clinq's multi-role platform (Brand, Creator, Clipper, Admin) - architected and built routing across 25+ pages spanning all four roles, plus role resolution and signup/OTP auth flows from scratch, integrating with a Django REST backend.
- Shipped creator-side dashboard features (wallet chart, submissions, profile management), brand/clipper profile flows with validated edit/save/confirm states, and a reusable component library (earnings chart, campaign cards, loading skeletons) used across all four roles.
- Diagnosed and fixed a network-drop bug causing mid-session logouts, plus feed-loading and campaign form validation failures - eliminating a recurring source of user-facing crashes across the app; currently building the frontend for a new e-commerce module.

Frontend Developer Intern — SheGruh Mar 2026 – Apr 2026

React · TypeScript · JavaScript · CSS · Git

- Shipped a Bill-of-Materials module and a Project Timeline view (multi-assignee support) into a live B2B production app, working in a TypeScript + React codebase alongside back engineers.
- Found, root-caused, and patched a permission-logic bug exposing restricted project data to unauthorized users — flagged and fixed within the same sprint.
- Fixed 10+ UI bugs across 3 modules and extracted repeated UI patterns into a shared component library, reducing duplicate code.

PROJECTS

QuickDrive — Secure Cloud File Management & Sharing Platform [Node.js · Express · Prisma · PostgreSQL · Supabase]

- Designed and built a full-stack file-sharing platform end-to-end: uploads, folder hierarchies, and folder-level access permissions.
- Modeled a relational PostgreSQL schema in Prisma supporting recursive nested folder hierarchies and per-folder permission inheritance; added QR-code shareable links for passwordless file access.
- Implemented authentication and authorization middleware to enforce per-folder access control across all routes; structured the backend in clean MVC with centralized error handling and Supabase Storage buckets, decoupling file storage from the application server.
- Load-tested core routes with k6 at 50 concurrent virtual users, sustaining 100% request success (0 failures across 620 requests) at 13+ req/s throughput; deployed live on Render.

VirtuCasa — Interior Design Studio Website [React · Tailwind CSS · Vite]

- Built and deployed a multi-page site for a paying interior-design client — gathering requirements directly from the client — replacing a static, unmaintained page.
- Implemented client-side routing and a responsive Tailwind design system tested across desktop and mobile breakpoints; configured hosting and domain mapping for production.
- Continue to maintain and ship updates based on live client feedback.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React, HTML5, CSS3, Tailwind CSS, Vite, Custom Hooks, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Auth

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma

Tools: Postman, k6, Firebase, n8n (workflow automation), VS Code, AI-assisted development (Claude, OpenAI Codex, Gemini)

Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD, Render

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ Data Structures & Algorithms problems on LeetCode; maintained 100-Days coding streak badges in 2025 and 2026.
- Designed, built, deployed, and load-tested 2 independent production systems (QuickDrive, VirtuCasa) spanning SQL and NoSQL databases.
- AI Classroom Foundation Course — Jio Institute (2026) · n8n Level 1 Certification — n8n (2026)

EDUCATION

Master of Computer Applications (MCA) — University of Rajasthan, Jaipur

2024 – 2026

Relevant coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

B.Sc. Mathematics — MGSU University, Bikaner

2020 – 2023
